Introduction

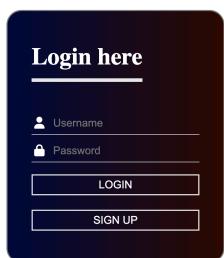

With an emphasis on serving consumers who care about the environment, AZoom Car Rental specializes in offering electric cars to the public. Customers can rent these automobiles for daily, weekly, or monthly periods, and they provide a range of electric vehicles. Customers can pick up their reserved car and return it to a specific parking space from AZoom Car Rental's two branches in town. This company two types of cars: Premium and Normal.

References I used for this website

To be honest, I spent a lot of time browsing through numerous websites including online shopping, automobile sales, official branded car websites, YouTube, W3Schools, etc. I looked over their example codes and inspections. In addition, I pay credit to the several YouTubers whose videos I watched and referred to.

About my website

Following my browsing and referencing, I reviewed the lecturer's advice. I then started by creating the log-in page.

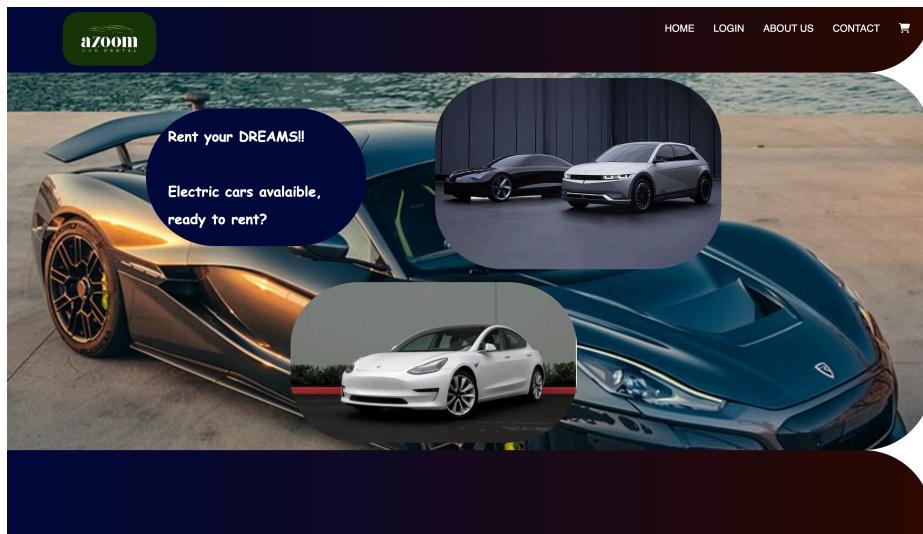

The login page features a dark blue header with the text "Login here" in white. Below the header is a form with fields for "Username" and "Password", each preceded by an icon (a person for username and a lock for password). There are two buttons at the bottom: "LOGIN" in white and "SIGN UP" in light blue.

Initially, my intention was for the login page to be the first thing that visitors see when clicking the link. however, I got an idea to show the preview of my homepage and only take them to log in when they want to. If you don't have account already, you can register by signing up.

The registration form has a dark blue header with the text "Registration Form" in white. Below the header is a form with fields for "Username", "Email Address", "Password", and "Confirm Password", each preceded by an icon. There is one button at the bottom: "SIGN UP" in white.

I carried on creating more pages, one for before login and one for after login. I prevent them from seeing the reservation section, the number of cars available, etc. before they check in. For instance, the website will direct users to the log-in page if they click "reserve" on the home page. The following is my homepage.

nevertheless, you can access the reservation section—located in the upper right corner of the page—by logging in. after which you can click "Reserve" to select the vehicle of your choice from the main page. In that case, the reservation page will appear. Credit cards are the sole accepted form of payment.

The "about us" page provides information about our website.

The screenshot shows the 'About Us' page of the Azoom Car Rental website. At the top, there's a dark header with the 'azoom CAR RENTAL' logo, navigation links for 'HOME', 'LOGIN', 'ABOUT US', 'CONTACT', and a shopping cart icon. Below the header is a large dark box containing the following text:

About Us....

Azoom Car Rental is a local car rental company that specializes in renting electric car for the public. There is a range of electric cars available and for the environmental conscious customers, Azoom Car Rental offers an attractive option for transportation.

How we offer?

The car rental period can be daily, weekly, or monthly depending on the needs of the customer. Reservation is required through online booking system using a credit card, and payment must be made by credit card only. Currently, Azoom Car Rental has two branches in town and customers can pick up the reserved car and return the car at a designated car park.

Azoom is always ready for you!!!

Our contact information is available on the contact page.

The screenshot shows the 'Contact' page of the Azoom Car Rental website. It features a dark header with the 'azoom CAR RENTAL' logo and navigation links for 'HOME', 'LOGIN', 'ABOUT US', 'CONTACT', and a shopping cart icon. Below the header is a white contact form with a dark sidebar on the left containing 'Contact Info' and social media links. The contact form includes fields for First Name, Last Name, Email Address, Mobile Number, and a message area, with a 'Send' button at the bottom.

Moreover, you can find our contact details at footer as well.

The screenshot shows the footer section of the Azoom Car Rental website. It includes the 'azoom CAR RENTAL' logo, contact information (email: azoomforyou@gmail.com, phone: +65 67677878), links to 'Contact', 'Links', and 'Newsletter' sections, and social media icons for Facebook, Twitter, Instagram, and LinkedIn. At the bottom, there's a note about high-quality and reliable cars, a row of small icons, and a copyright notice: 'Azoom Car Rental Service © 2023 - All Rights Reserved'.

Conclusion

I frequently apply HTML and CSS because the project involves writing web design for the rental website of AZoom Car Rental Company. There are very few JavaScript codes included. Therefore, there won't be any steps involved, such as verifying the payment card or login credentials. I did, however, put a word limit in the reservation part. You are unable to click "reserve" before completing each inquiry. Therefore, I'm hoping that my website's interface and seamless page redirection would please my clients.

NOTE for lecturer

-sometimes, there may be a message of dangerous alert, but you can keep going with detail → visit ... page.

-I put both zip file including in Google Drive and GitHub link.

-I put “Web internet location” in Google Drive as well. (I am not sure it is accessible but I can)

-Please let me know if something is wrong with my submission, Thank You.
